Art Unit: 1617

DETAILED ACTION

1. The request filed on January 04, 2002 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/254152 is acceptable and a CPA has been established. An action on the CPA follows.

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 13, 14 29-36, drawn to an oil containing arachidonic acid and a composition containing the same, classified in class 514, subclass 560.
 - II. Claims 37-46, drawn to an oil containing mead acid and a composition containing the same, classified in class 514, subclass 560.
 - III Claims 19, 20 and 23-28, drawn to a method of producing unsaturated fatty acidcontaining oils, classifies in class 514, subclass 560.
- 2. Inventions of Group III and Groups (I and II) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as through a synthetic method.
- 1. Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 1617

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions represent two patentable distinct fatty acids: arachidonic acid and mead acid. They differ with respect to biological functions, chemical structures (four double bonds in arachidonic acid and three double bonds in mead acid), and method of making the particular acids. They therefore have different issues regarding patentability and enablement and represent patentable distinct subject matter.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Species Election

If applicants elect invention of group I or II, following species election would be required.

Art Unit: 1617

4. This application contains claims directed to the following patentably distinct species of the claimed invention: infant formula (claim 30 in group I, or claim 45 in group II); and animal feed (claim 31 in group I, or claim 46 in group II).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 13, 14, 29, 33-44 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

If applicants elect group III, following species election would be required.

Art Unit: 1617

5. Claims 19, 20, 23-28 are generic to a plurality of disclosed patentably distinct species comprising various unsaturated fatty acids including γ -linolenic acid, dihomo- γ -linolenic acid, arachidonic acid, eicosapentaenoic acid and mead acid. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shengjun Wang, Ph.D. whose telephone number is (703) 308-4554. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minna Moezie, J.D., can be reached on (703) 308-4612. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
